MEMBER SOLUTIONS CERTIFIED AS A LEVEL ONE SERVICE PROVIDER UNDER THE PAYMENT CARD INDUSTRY DATA SECURITY STANDARDS (PCI DSS)

January 19, 2010 – Jenkintown, PA – Member Solutions (www.membersolutions.com), a leading provider of solutions to membership-based businesses, announced that it has been certified as a Level One Service Provider under the Payment Card Industry Data Security Standard (PCI DSS). The certification was awarded after an exhaustive independent audit of Member Solutions' business operations and practices conducted by Trustwave (www.trustwave.com), the leading provider of on-demand data security and payment card industry compliance management solutions, and a Qualified Security Assessor (QSA) registered with the PCI Security Standards Council.

"Choosing to certify to this higher standard shows that we take the security of customer account data very seriously," said Member Solutions CEO, Steven Pinado. "Our clients trust us with critical personal, financial and business information. Keeping that information secure through compliance with PCI standards is a vital part of our business."

The standard, PCI DSS, was formed to help organizations proactively secure customer account data. Endorsed by major credit card brands American Express, Discover Financial Services, JCB International, MasterCard Worldwide and Visa Inc., the PCI DSS segments payment service provider compliance requirements into three levels based on the number of transactions processed and/or transmitted yearly. Level One is the highest ranking and carries the most stringent certification requirements.

A comprehensive on-site audit of systems and processes, review of documented policies and procedures, recurring network security scans, and system penetration testing are performed to ensure Member Solutions meets the Level One Service Provider requirements and complies with the twelve core elements of the PCI DSS.
